

AMENDMENTS TO THE SPECIFICATION

In the Specification

Please substitute the following amended paragraph(s) and/or section(s) (deleted matter is shown by strikethrough and added matter is shown by underlining):

Page 1, line 5, please add the following header:

Background of the Invention

Page 1, line 36, please add the following header:

Summary of the Invention

Page 9, line 3, please add the following header:

Description of the Figures

Page 9, line 29, please add the following header:

Detailed Description of the Invention

In the Abstract

Please substitute the following amended Abstract for the Abstract as currently pending (deleted matter is shown by strikethrough and added matter is shown by underlining):

An aircraft landing gear door assembly includes a plurality of doors (~~1 to 4~~) moveable between open positions, in which landing gear can be deployed through an aperture, and closed positions, in which the doors are closed across the aperture. The plurality of doors includes first [[(1)]] and second [[(2)]] doors arranged such that, when the landing gear is deployed, the second door [[(2)]] is obstructed from moving between its open and closed positions while the first door

[[(1)]] is free to move between its open and closed positions. After the landing gear is deployed the first door [[(1)]] is closed.
